FAQ: Frequently Asked Questions about Tomos 4 Engines

Q1: What is the recommended fuel-oil mixture for a Tomos 4 engine?

A1: The recommended fuel-oil mixture varies depending on the specific Tomos 4 model. Always consult your owner's manual for the precise ratio. Typically, it's around 25:1 (25 parts fuel to 1 part oil), but using the incorrect ratio can severely damage your engine.

Q2: How often should I change the oil in my Tomos 4 engine?

Users Manual Tomos 4 Engine

A2: The frequency of oil changes depends on usage. For frequent use, consider changing the oil every 500-1000 miles or every 3 months. Less frequent use might allow for longer intervals, but it's always safer to err on the side of caution.

Q3: My Tomos 4 engine is smoking excessively. What could be the cause?

A3: Excessive smoke usually points to an issue with the fuel-oil mixture (too much oil) or a problem within the engine itself (e.g., worn piston rings, damaged seals). Check the fuel-oil ratio first, and if the problem persists, seek professional help.

Q4: How do I adjust the carburetor on my Tomos 4 engine?

A4: Carburetor adjustment is a complex process and should only be attempted if you have experience working with small engines. Incorrect adjustment can severely affect engine performance and fuel efficiency. If you're unsure, consult a qualified mechanic.
