FAQ: Edgestar Kegerator Questions and Answers

Q1: My Edgestar kegerator isn't getting cold enough. What should I do?

A1: Check the manual's troubleshooting section for solutions. Common causes include improper placement (poor ventilation), a faulty thermostat, or a problem with the cooling unit. Ensure the unit is level, properly plugged in, and that the vents aren't obstructed. If the issue persists after checking these points, contact Edgestar support or a qualified technician.

Q2: How often should I clean my Edgestar kegerator?

A2: The manual will recommend a cleaning schedule. Generally, a thorough cleaning, including sanitization, should be performed after each keg. Regular wiping down of spills and exterior cleaning helps maintain hygiene. Refer to the manual for specific cleaning

instructions and recommended sanitizing agents.

Q3: How do I change the CO2 tank on my Edgestar kegerator?

A3: Your Edgestar kegerator manual will provide detailed, step-by-step instructions for safely disconnecting the empty CO2 tank and connecting a new one. Always follow these instructions precisely to avoid accidents. Remember to turn off the CO2 regulator before disconnecting or connecting the tank.

Q4: What type of beer can I use in my Edgestar kegerator?

A4: Most Edgestar kegerators accommodate standard 5-gallon corny kegs. You can use commercially produced draft beer, homebrew, or even some bottled beer (though this requires careful attention to proper sanitization and handling). The manual may provide more specific compatibility information.

Q5: My beer is too foamy. What's wrong?

A5: Excessive foam usually points to too much CO2 pressure. Consult the manual to adjust

the regulator settings. It also could be a problem with the pour technique – practice a slow, controlled pour to minimize foaming.

Q6: Where can I find replacement parts for my Edgestar kegerator?

A6: The Edgestar website usually lists authorized retailers or provides contact information for purchasing replacement parts. The manual might also provide guidance on finding approved parts.

Q7: Can I use different types of kegs with my Edgestar kegerator?

A7: While most Edgestar kegerators are designed for standard 5-gallon corny kegs, compatibility with other keg types may vary. Check the manual for specifics. Improperly sized or designed kegs may damage the kegerator or cause operational issues.

Q8: My Edgestar kegerator is leaking. What should I do?

A8: Identify the source of the leak carefully (CO2 lines, keg coupler, etc.) before attempting any repairs. The manual may have troubleshooting guidance. If you cannot

identify or fix the leak, contact customer service or a qualified repair technician. Never attempt to repair gas lines without proper knowledge and safety precautions.
