materials like linen and cotton. The steam power helps to quickly and effectively remove wrinkles, saving you valuable time.

- **Non-Stick Soleplate:** The iron's non-stick soleplate ensures smooth gliding over fabrics, preventing snags and reducing the risk of damage to your clothes. Regular **Philips GC4412 iron cleaning** is therefore recommended.

Delicate materials require a lower steam setting, while heavier fabrics benefit from a higher output. This precise control minimizes the risk of damaging delicate garments and ensures optimum results across different materials.
- **Spray Function:** A fine mist spray function helps to dampen stubborn creases before ironing, making them easier to remove. This is particularly useful for deeply set wrinkles.
- **Vertical Steam:** The vertical steam function allows you to refresh garments hanging on a clothes rack, perfect for removing creases from suits or curtains without having to iron them flat on an ironing board. This is a convenient feature that adds to the versatility of the iron.

5. **Steam Function:** Use the steam function to remove stubborn creases or wrinkles. Remember to always use the steam function at the appropriate temperature setting for the garment material. This requires careful control and understanding of the garment's material characteristics.

6. **Vertical Steam:** For garments hung on a hanger, use the vertical steam function to remove light wrinkles. Hold the iron a few inches away from the garment.
