2. Problem-Solution-Benefit (PSB) Pattern

This highly effective pattern is ideal for persuasive presentations. It identifies a problem, presents a solution, and then clearly outlines the benefits of adopting that solution. This structure is logical, easy to follow, and compelling.

4. Comparative/Contrastive Pattern

This pattern is excellent for comparing and contrasting different options, ideas, or approaches. It allows for a balanced presentation of information, enabling the audience to make informed decisions.

- **Example:** A presentation comparing two different marketing strategies, highlighting the pros and cons of each, would effectively utilize this pattern.

5. Topical Pattern

This flexible pattern organizes information around several key themes or topics. This pattern is particularly useful when dealing with complex subjects that can be broken down into several distinct parts.
