- **Boosting self-esteem and resilience:** Successfully completing a coloring page can provide a sense of accomplishment and boost a child's self-esteem, particularly when they are feeling unwell and unable to participate in their usual activities. This sense of accomplishment can translate to a stronger feeling of resilience during future illnesses.

Addressing Potential Concerns and Limitations

While germs coloring books offer many benefits, it's crucial to be mindful of potential drawbacks. Some children might find the illustrations of germs frightening.
