FAQ: Addressing Common Questions about Kidney Diseases

Q1: What are the most common causes of chronic kidney disease (CKD)?

A1: Diabetes and hypertension are the leading causes of CKD globally. Other significant contributors include glomerulonephritis, polycystic kidney disease, and obstructive uropathy. Additionally, certain medications and genetic predispositions can play a role.

Q2: What are the symptoms of kidney disease?

A2: Early-stage kidney disease often presents with few or no symptoms. As the disease progresses, symptoms may include fatigue, swelling in the legs and ankles, changes in urination (increased or decreased frequency), nausea, loss of appetite, shortness of breath, and persistent itching.

Q3: How is kidney disease diagnosed?

A3: Diagnosis typically involves blood tests (measuring creatinine and glomerular filtration rate – GFR), urine tests (looking for protein and other abnormalities), and imaging studies (ultrasound, CT scan). Kidney biopsy may be necessary in certain cases to determine the underlying cause.

Q4: What are the treatment options for kidney disease?

A4: Treatment depends on the type and severity of kidney disease. It may include managing underlying conditions (such as diabetes and hypertension), lifestyle modifications (diet, exercise), medication to slow disease progression, and dialysis or kidney transplantation in advanced stages.

Q5: Is kidney disease preventable?

A5: While some causes of kidney disease are not preventable, many risk factors are modifiable. Controlling blood pressure and blood sugar, maintaining a healthy weight, avoiding smoking, and staying well-hydrated can significantly reduce the risk of developing kidney disease.

Q6: What is the prognosis for someone with kidney disease?

A6: The prognosis varies greatly depending on the type and stage of kidney disease, as well as the overall health of the individual. Early diagnosis and appropriate management can significantly improve outcomes and slow disease progression.

Q7: What is the role of a nephrologist?
