Key Features and Functionality: A Comparison

The Audio 20, a more basic system, typically features a CD player, AM/FM radio, and auxiliary input for external audio sources. The Audio 50 builds upon this foundation, often including a USB port for media playback and potentially a larger display screen. However, the COMAND APS system stands apart, offering significantly enhanced capabilities. COMAND APS (Audio 50 APS) systems boast integrated hard-drive navigation, a larger, higher-resolution screen, and voice control functionality. Let's break down some key aspects:

- **Audio Playback:** All three systems support AM/FM radio and CD playback (where applicable). The Audio 50 and COMAND APS offer USB and auxiliary input options,

expanding media sources.

- **Navigation:** The COMAND APS system shines here with its integrated hard-drive navigation, offering detailed maps and turn-by-turn guidance. The Audio 20 and Audio 50 typically lack integrated navigation, although some models might offer optional navigation upgrades. Consider this when researching used Mercedes models.
- **Bluetooth Connectivity:** Bluetooth is usually integrated into all three systems, allowing for hands-free calling and wireless audio streaming from compatible devices. The process of pairing your phone varies slightly depending on the system, but the owner's manuals provide clear step-by-step instructions.

Troubleshooting Common Issues: Maximizing Your System's Performance

Even the most advanced systems can occasionally encounter issues. Here are some common problems and solutions often found addressed within the Audio 20, Audio 50, and COMAND APS owner's manuals:

- **Bluetooth Pairing Problems:** Ensure your device's Bluetooth is activated and discoverable. Check the system's pairing settings within the infotainment menu. Occasionally, a system reset might be necessary.
