- **HP's Support Website:** This is the primary source. Navigate to HP's official support website, enter your printer's model number (usually found on a sticker on the printer itself), and search for "service manual" or "technical documentation." You might find it listed as a "repair manual" or even a "parts list" depending on the model. Be aware that access might be limited to registered service providers for some models.
- **Third-Party Websites:** While caution is advised, some third-party websites may offer downloads of HP DeskJet service manuals. Always verify the source's legitimacy and scan downloaded files for viruses before opening them.
- **Online Forums and Communities:** Engaging with online communities dedicated to HP printers or printer repair can help you locate links to service manuals or even connect with individuals who might have a copy they can share.
- **Your Printer's Packaging (if you still have it):** Sometimes, a paper version of a limited service guide is included with the printer. While not always as detailed as the full online manual, it can still be a helpful starting point.
